

DPST Accessories and Auxiliary

DPST Conductivity Standards

The four DPST conductivity standard solutions cover the common range of measured conductivity. The solutions are provided in 100 ml, 500 ml and 1 l plastic bottles, sets contain three bottles of the same volume. Conductivity is given at 20 °C.

DPST Conductivity Standard	Conductivity
KCl, c = 1,00 mol/l	102,1 mS/cm
KCl, c = 100 mmol/l	11,67 mS/cm
KCl, c = 10,0 mmol/l	1 278 •S/cm
KCl, c = 1,00 mmol/l	133,2 •S/cm
